Introduction

"Om Poornamidam Poornat Poornamudachyate

Poornasya Poornamadaya Poornamevavashisyate"

- Rig Veda

Which means Macrocosm is contained in the microcosm. The Universe (macro) is contained in the atom (micro). So to understand & express the divinity within, we need to understand both NLP (Microcosm) & also the Grand & Eternal Vedic science (Macrocosm).

"The Whole is Better than the Parts"

Vedas:

The Vedas contain keys to the perennial wisdom of humanity. The Vedas proclaim that we are all children of light, children of the seers, who have wandered far. In order for us to evolve in consciousness we must revitalize the seeds of our higher evolution that the ancient sages planted within us millennia ago. Hence the relevance of the Vedas must continue to grow and is crucial to the emergence of a new spiritual global culture.

NLP:

Neuro-Linguistic Programming (NLP) was created by psychotherapist John Grinder; mathematician & psychologist Richard Bandler in 1970s. Neuro stands for the nerves or nervous system, Linguistic stands for the language which we are using continuously to talk to others (predominantly to self), Programming is borrowed from the computer language which means installing change. Thus,

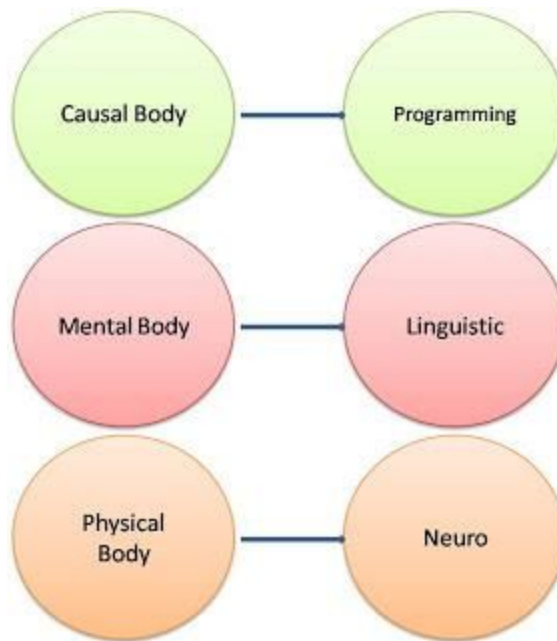

N - Neurology - The mind and how we think

L - Linguistics - How we use language and how it affects us(mentally, emotionally & intellectually)

P - Programming - How we sequence our actions to achieve what we want in life (Body-Mind-Soul)

"Each soul is potentially divine. The goal is to manifest this divinity within, by controlling Nature - external and internal".

We do this either by work, or worship, or psychic control, or philosophy, by one, or more, or all of these and be free.

The Senses, Reason and Intuition are our ways of knowledge to understand the reality or nature. Science, Philosophy and Mysticism are true and useful in their own places and together constitute the highroad of knowledge of life as a whole.

The evolutionary movement of self from physical to biological, biological to logical and logical to spiritual is an ongoing process & VedicNLP is a grand integral method which combines in itself the principles and laws discovered and established by science, metaphysics and the higher intuitive realms of the universe.

VedicNLP is a divine outcome of 20 years of Intellectual & Intuitive research which is an intensely practical science using the principles and tools of the ancient **Vedic or Yogic Science & Neuro-science.**

Purpose:

Scientific Exploration of the essence of Existence & Meaning towards Self-recognition & Self-awakening in various degrees is the central purpose of VedicNLP.
